

## **TITLE: Health Care Protection Profile Initiative**

**Panel Chair:** Diann A. Carpenter, Arca Systems

**Panelists:**

Dr. Ross Anderson, Cambridge University

Lewis Lorton, DDS, MSD, Forum on Privacy and Security in Healthcare

Arnold Johnson, NIAP

HHS/HCFA Representative, TBD

Health Care Community Representative, TBD

**Abstract :**

Protection Profiles and the Common Criteria can provide an effective means of documenting the security needs of a user community. This panel examines the initiative supported by NIAP, to document the needs of the Healthcare Community, as expressed in the HIPAA and HCFA regulations, using the Common Criteria.

Each panel member will discuss the potential impact of using a common set of requirements and evaluation methodologies, on the ability of the Healthcare Community to demonstrate compliance with Federal, State, Agency, and organizational security policies to protect patient information.

**Background of audience you are trying to attract.**

We are hoping to attract the healthcare community leaders, other community leaders who may want to see if this type of effort is worthwhile, and security professionals engaged in this type of work regardless of the community supported.
